ComplyDo

DEVELOPER DOCUMENTATION

Status API

Documentation & Reference Guide

API VERSION	BASE	FORMAT	AUTH
v2	5bg5vd3lm38w.statuspage.io	JSON	None required

OVERVIEW

Contents

Programmatic access to the ComplyDo status page. All endpoints return JSON and require no authentication. Examples available at complydo.statuspage.io/api.

01 · TOOLS

Javascript Library

A wrapper for the status page API exposing convenient actions for embedding your status anywhere.

CDN

```
https://cdn.statuspage.io/se-v2.js
```

02 · DATA ENDPOINTS

Summary GET

Full snapshot of the status page — status indicator, component statuses, unresolved incidents, and any upcoming or in-progress scheduled maintenances.

```
https://5bg5vd3lm38w.statuspage.io/api/v2/summary.json
```

03 · DATA ENDPOINTS

Status GET

Overall status rollup including a machine-readable indicator and a human-readable blended component description.

```
https://5bg5vd3lm38w.statuspage.io/api/v2/status.json
```

none | minor | major | critical

04 · DATA ENDPOINTS

Components GET

List of all components, each with its current operational status.

```
https://5bg5vd3lm38w.statuspage.io/api/v2/components.json
```

operational | degraded_performance | partial_outage | major_outage

05 · DATA ENDPOINTS

Incidents

Composed of many incident updates. Impact is calculated from a blend of component statuses, or an optional override.

STATUS	
Investigating	Active
Identified	Active
Monitoring	Active
Resolved	Closed
Postmortem	Closed

IMPACT	
None	black
Minor	yellow
Major	orange
Critical	red

Unresolved incidents

GET

Only returns incidents in Investigating, Identified, or Monitoring state.

```
https://5bg5vd3lm38w.statuspage.io/api/v2/incidents/unresolved.json
```

All incidents

GET

The 50 most recent incidents — including unresolved, Resolved, and Postmortem.

```
https://5bg5vd3lm38w.statuspage.io/api/v2/incidents.json
```

06 · DATA ENDPOINTS

Scheduled Maintenances

Planned outages or upgrades. Close siblings of Incidents, each progressing through its own status lifecycle with impact calculated the same way.

STATUS	
Scheduled	Upcoming
In Progress	Active
Verifying	Active
Completed	Closed

IMPACT	
None	black
Minor	yellow
Major	orange
Critical	red

Upcoming maintenances

GET

Only returns maintenances still in the Scheduled state.

```
https://5bg5vd3lm38w.statuspage.io/api/v2/scheduled-maintenances/upcoming.json
```

Active maintenances

GET

Only returns maintenances in the In Progress or Verifying state.

```
https://5bg5vd3lm38w.statuspage.io/api/v2/scheduled-maintenances/active.json
```

All scheduled maintenances

GET

The 50 most recent scheduled maintenances — including Completed.

```
https://5bg5vd3lm38w.statuspage.io/api/v2/scheduled-maintenances.json
```
